PROFILE

Senior iOS Developer with **12+ years** of native iOS experience, including team-lead roles in India and Cambodia. Build production apps in **Swift** and **SwiftUI** (UIKit where it fits) on **MVVM-C** and **Clean Architecture**, with offline-first storage and secure sign-in. Own features end to end, from design to App Store release, and mentor developers in Agile teams. Recently started contributing to the Toast Now Android app in **Kotlin**.

- **98–99% crash-free** on Toast Now (4.9★, 12K+ App Store ratings), backed by XCTest, Firebase Crashlytics and CI/CD
- **Toast Hackathon 2026: 2nd in India, 8th across Toast** with an AI inventory agent; runner-up in 2024
- **Offline-first** apps on SwiftData, Core Data and SQLite that keep working in low-connectivity kitchens
- Three personal apps shipped on the App Store; **Moviez reached 7.3K+ downloads**
- **AI-assisted development** with Claude Code and Codex daily, guided by AGENTS.md / CLAUDE.md rules I authored

EXPERIENCE

Senior Software Engineer, *xtraCHEF by Toast, Inc.*

2020 – Present · Chennai, India

- Build inventory features for the **Toast Now** iOS app on the Retail Inventory team: managers mark items in or out of stock and availability stays in sync across locations, online or offline. Swift, SwiftUI, inventory APIs, regular App Store releases.
- Keep a **98–99% crash-free** rate with unit tests (XCTest) and CI/CD on **GitHub Actions** (previously Jenkins).
- Built **xtraCHEF** camera invoice upload with processing status tracked in the app, and stock counts from the phone that work offline and sync later; stability monitored with Firebase Crashlytics.
- Lead cross-functional work with developers, designers and product managers on roadmap features, and coordinate with other Product Development teams so releases ship consistently and on time.
- **Hackathon 2026, 2nd in India and 8th at Toast:** Inventory Scan Agent. The iOS app reads a bottle or shelf from one photo; an AI agent checks catalog and stock and recommends one action, asks when unsure and only drafts purchase orders. **Runner-up 2024** with voice-to-inventory counting.
- Recently started contributing to the Toast Now **Android** app in **Kotlin**. Use Claude Code and Codex daily, and wrote the AGENTS.md / CLAUDE.md guidelines that keep agents within our architecture.

Mobile Team Leader, *SkyBooking Pvt. Ltd.*

2017 – 2019 · Phnom Penh, Cambodia

- Led mobile development for a Cambodian online booking platform for flights and hotels. Built new iOS apps and drove continuous improvement through new features and issue resolution.

iOS Team Leader, *Nanita Tech Co., Pvt. Ltd.*

2016 – 2017 · Phnom Penh, Cambodia

- Led the team that developed and released an iOS app on the App Store, delivering on quality and performance.

iOS Developer, *Casperon Technologies Pvt. Ltd.*

2015 – 2016 · Chennai, India

- Owned end-to-end delivery of iOS features: design, implementation and maintenance. Worked on **Cabily**, a taxi dispatch app, building its real-time messaging over **sockets and XMPP**.

iOS Developer, *JEMS Nets Solutions*

2014 – 2015 · Chennai, India

- Worked with lead developers to analyse, design, develop and optimise apps for performance.

PERSONAL APPS

All three apps are listed on the App Store under my friend Aravinth Sakthivel's developer account. I designed, built and released them.

CineFlicx: Movie & TV Tracker

App Store ↗

2026 · iPhone, iPad, Mac, Vision Pro · Swift, SwiftUI

Film and TV discovery and tracking with natural-language search processed on device, mood- and time-based picks, where to watch, next-episode reminders and a diary with ratings and stats. Imports from Letterboxd, IMDb and Trakt; no account needed.

PawAlert: Rescue Alerts Nearby

App Store ↗

2026 · Swift, SwiftUI

Photograph an injured street animal and drop a pin; nearby volunteers get a real-time alert and the rescue can be tracked live.

Moviez

App Store ↗

2020, through v3.0 · **7.3K+ downloads** (App Store Connect, Nov 2026)

Movie and TV companion on the TMDb API: release reminders, watchlist and favourites with cloud sync, actor profiles, trailers and local showtimes.

SKILLS

iOS	Swift, SwiftUI, UIKit, Swift Concurrency (async/await), MapKit, Core Location
Architecture	MVVM, MVVM-C, Clean Architecture, Dependency Injection
Data and offline	SwiftData, Core Data, SQLite, offline-first sync
Networking	REST, GraphQL, sockets (real-time), XMPP
Security and quality	Auth0, Firebase Auth, Face ID / Touch ID, Firebase Crashlytics, XCTest
Delivery	GitHub Actions, Jenkins, Git / GitHub, Xcode, App Store releases, Agile / Scrum
Android	Kotlin (recently started, on the Toast Now Android app)
AI-assisted development	Claude Code, Codex, AGENTS.md / CLAUDE.md agent guidelines

EDUCATION

Diploma in Electronics and Communication Engineering (ECE)

2007 – 2010

Shanmuga Polytechnic College
